

Friuli Venezia Giulia, An epitome of Italian beauty

Friuli Venezia Giulia is proof that there are still places to explore in Italy. A hidden village to lose yourself in, the last vintage to taste, a mountain path to travel, new stories to listen to: each trip to Friuli Venezia Giulia is as exciting as the first time.

This region encloses all the characteristics that have made Italy a place loved by writers, poets and travellers, from the peaks of the Alps and the Dolomites, to the waves of the Adriatic, the squares of elegant cities, the streets of old villages and the vine-clad hills of the Collio region.

On the border between three countries yet at the heart of Europe, this region has made its geographical position its main strength: in just two hours, you can get to see the Italian, Slavic and Germanic cultures, expressed in some sort of a kaleidoscope of traditions, languages and religions.

DISCOVER FRIULI VENEZIA GIULIA

A sea of wellbeing for the whole family

A coast outlined by golden sand and white cliffs

From the golden beaches of **Lignano** and **Grado**, with their shallow and sandy seabeds, to the rocky inlets of the Duino nature reserve, where vertical cliffs drop sheer into the waves. Relaxation, safety and fun, but also the charm of new experiences, carried out in natural surroundings, days full of activities. The sea in Friuli Venezia Giulia contains many offers in one. It is an ideal family tourist destination with certified facilities and a welcome programme which has been specially created to meet the needs of children and parents; at the same time, the summer in Friuli Venezia Giulia strolls through the shopping streets of Lignano Sabbiadoro; or relaxes in the silence and serenity of Grado's lagoon and sandbanks; or follows the natural rhythm of the fishermen in Marano Lagunare and explores the Gulf of Trieste's pristine bays. The 130 km of curved coastline washed by the **Adriatic Sea**, provide visitors with a wide range of seaside resorts.

Lignano Sabbiadoro – "*Italy's little Florida*" by Ernest Hemingway – Synonymous with vivacity, **Sabbiadoro**, together with **Lignano Pineta** and **Lignano Riviera**, is a vibrant world of sports and healthy activities. Besides meticulous entertainment and Wi-Fi internet access, windsurfing, swimming, sailing, SUP, canoe and parasailing schools can be found on the beach, as well as gentle gymnastics lessons and water Nordic walking. The wide range of recreational opportunities for children and teenagers, which include six different theme parks, water games, numerous sporting activities and the characteristics of the coast itself – **8 kilometres of golden sand**, shallow waters and a calm sea – make Lignano a perfect holiday destination for families too.

A relaxing thalassotherapy centre loved by Austro-Hungarian Emperors: along with the natural beauty of its lagoon and an exceptional microclimate that ensures a permanently sun-drenched coast, **Grado** is also known as the *Island of the Sun* thanks to the fact that all of its coasts are south facing. It boasts the considerable beneficial effects of its sand and iodine-rich air, as well as the **Italian record for Blue Flag (Bandiere Blu)** beaches. A true family destination, the town is often associated with its **spas** and its **thermal water park**, made up of an 85-metre ergonomic swimming pool equipped with whirlpool, small waterfalls, thermal pools, springboards and water games. A maze of narrow and charming alleys and *calli*, here you can find the best local food and wine, traditionally based on fresh fish.

Further along the Friuli Venezia Giulia riviera there is the **Marina Julia** beach in Monfalcone, ideal kitesurf location with one of the best launch corridors in the upper Adriatic, and **Sistiana bay**, with its rocky and pebbly beaches. There is also something for nature lovers and more adventurous visitors: the steep rugged cliffs of the Karst coast. Why not enjoy the splendid panorama as you perch high on the winding road along the coast leading to **Trieste** where the verdant greens of the Carso meet the resplendent blues of the sea, an interplay of contrasts which makes for a unique landscape? In summer, the whole shoreline teems with life in a swarm of small bathing establishments. The ones that stand out most are the fascinating Bay of Sistiana, with its view on the Duino Castle and the historical *Pedocin* in the city centre: the only beach in Europe with a wall that **separates women from men**, a legacy of the Austro-Hungarian era.

Jewels of art

One thousand facets of art at the border between the East and the West

Elegant and discreet, proud of their own beauty and never exhibitionist, the cities of Friuli Venezia Giulia have travelled the world, listening to foreign languages and meeting distant cultures and religions. For centuries Celts, Romans, Huns, Lombards, Venetians and Austro-Hungarians passed through these places, all leaving an indelible mark that mingled with local traditions. Thus Trieste "dressed in Hapsburg clothes", Udine became the home of Tiepolo, Gorizia was called the "Austrian Nice" and Pordenone, whose frescoed palaces have earned it the title of painted city, alternates between Roman, Baroque and Gothic influences, where one can find Sacile, the "Garden of the Serenissima Republic of Venice". These indelible marks can also be admired in places that have been recognised by **UNESCO** as World Heritage Sites:

Aquileia, ancient city of the Roman Empire; **Cividale del Friuli**, the capital of the first Italian Longobard Duchy; **Palmanova**, a fortress town enclosed in the shape of a nine-pointed star; and **Palù di Livenza**, a pile-dwelling site whose archaeological remains are partially found in the Archaeological Museum of Western Friuli in Pordenone.

The **FVGcard** is the key to the region's art and cultural treasures. This pass, valid for 2, 3 or 7 days, includes unlimited access to all the main museums and historical and archaeological sites anywhere in the region. It also accounts for participation in the guided tours organised by PromoTurismoFVG in artistic cities or hiring of multilingual audio guides.

Set in an unrivalled corner of the world, between the white karst landscape and the dazzling blue of the northernmost part of the Adriatic Sea, **Trieste, the region's most international city**, nominated **Science Capital of 2020**, has always been a vital meeting point between the East and the West because of the central role of its' port. The city that for centuries belonged to everyone and to no one still has the cosmopolitan soul of a place where different cultures, languages, religions and traditions can meet.

Udine, the elegant and convivial city, where the refined architecture is linked to the rustic charm of the osterias, the city in which Giambattista Tiepolo's (1696-1770) treasures are kept, the Venetian school's last great painter. This artist left a number of masterpieces, many of which can be seen in the Archiepiscopal Palace but also in the Cathedral and the Gallery of Historic Art in the castle with modern art on offer at Casa Cavazzini with the option of an audio-guide available to rent at the tourist office.

If Trieste reflects its ancient role of regional trade emporium, **Gorizia** has always been the real “melting pot” of Central Europe and it has been nominated the European Capital of Culture 2025 together with the city Nova Gorica in Slovenia. It was here, at the crossroads of three European cultures – Latin, Slav and German – and in a proper Border City, that the last wall of the Cold War between Eastern and Western Europe was torn down in 2004. The Hapsburg bourgeoisie loved Gorizia and its mild climate: not by chance the city was called the “Nice of the Adriatic” and, because of its climate, it was chosen as a residence by the last king of France, Charles X of Bourbon, who moved his sumptuous court to the magnificent noble palace Coronini Cronberg.

- ✓ **Pordenone** is an elegant town with a charming historical centre, a true mosaic of 16th century palazzos, Romanesque churches, porticoes, frescoed façades, and Gothic and Baroque buildings. A stroll beneath the prestigious arcades of the Corso or a visit to the museums or to the temporary art exhibits will allow you to discover local history and culture. All through the year the city hosts international art, music and literature festivals, thus becoming a dynamic and creative node within the area. In **Pordenone** comic strips are art with **Paff - Palazzo delle arti e del fumetto in Friuli**, a space designed to offer comic strips as a form of art as well as a form of communication and a mindset.

Living history

From the Ancient Romans to the Cold War: history was made here

Put yourself in the shoes of a legionary on watch among the pillars of the Roman forum, brandish a double-edged sword left behind on the battlefield by the Lombards, and discover traces of the “Iron Curtain” of the Cold War. Walk along paths trodden by a young German officer called Rommel, walk along the trenches that inspired the poet Giuseppe Ungaretti and search for the rooms of a fortress in the midst of powder magazines, gun batteries and tunnels. The past is truly in the air in Friuli Venezia Giulia, a region covered by **battlefields** and places where history was made, deep in the heart of Europe and open towards the Adriatic Sea. This strategic position has often meant Friuli Venezia Giulia was at the centre of great conflicts and of some of the most significant moments in history. It was here that the ancient Romans built the fourth town of Europe, **Aquileia**, town where the most extensive mosaic floor of Europe is kept in the Paleo-Christian Basilica, declared World Heritage Site by UNESCO in 1998. The Lombards, who were warriors and craftsmen, horsemen and goldsmiths, shaped the land and built a metropolis called *Forum Iulii* – now **Cividale** – from which the name Friuli is derived and where a small **Lombard Temple**, true jewel of ancient art, can be found, also a UNESCO Site since 2011. Later, the area became the favourite playground of the Hapsburg Empire.

World War I and 20th century history

This region was the principal scenery of the Italian frontline for over two and a half years during WWI. Hundreds of thousands of Italian and Austro-Hungarian soldiers faced each other in twelve great battles between May 24th, 1915 and the end of October 1917, on the Karst plateau and Julian Prealps, at the Slovenian border. Behind them, the Friuli plains were transformed into a great military machine of backroads, needed to supply logistic support to all the soldiers on the frontline. Udine then became the military capital of Italy from 1915 to 1917. On 24th October 1917, the situation changed abruptly when an Austro-German attack triggered what is universally known today as the “Retreat of Caporetto” and moved the frontline along the Piave river. After a year of Austro-Hungarian military administration, the defeat of the Habsburg Empire brought the current Friuli under the Savoy, while Trieste, which up until that moment had been one of the main Austro-Hungarian towns, became part of the Kingdom of Italy for the first time.

Such history can now be explored by visiting the countless traces that the conflict left in Friuli Venezia Giulia, creating a truly gigantic open-air museum. The Isonzo Karst, Natisone Valleys, and the Carnia and Tarvisio mountain peaks preserve trenches, fortifications, military posts and remains of frontline barracks. In the Tagliamento hill area, up to the Friulian Dolomites, the tragic events of the October-November 1917 retreat can be retraced. In Trieste, one of the symbolic cities of Italian twentieth-century history, and on the Karst Plateau, Austro-Hungarian and Italian remembrances co-exist as evidence of how the memories of these events are still alive.

As well as the original traces of the conflict, there are also the resources dedicated to remembrance of the conflict, built during subsequent years: from the classic museums (e.g. **First World War Museum of Gorizia and Ragogna**, and the **Diego De Henriquez War Museum for Peace in Trieste**), where thousands of the period's

military and other objects are kept; to the multimedia Museums as Redipuglia and Monte San Michele, opened in 2018.

Furthermore, Monuments were built to remember the most important moments of the conflict: the memorials (e.g. **Redipuglia War Memorial**, where the remains of over 100,000 fallen soldiers rest) and the **Austro-Hungarian cemeteries** (such as those of **Aurisina, Prosecco and Fogliano**).

All the itineraries, open-air museums and WWI locations can be found on the www.turismograndeguerrafvg.it, portal, the result of the inter-regional project of the same name, that saw Friuli Venezia Giulia as the lead region, alongside Veneto, Lombardy and the autonomous provinces of Trento and Bolzano.

They are places and historical traces which can be explored via the Percorso della Pace – Walk of Peace itinerary, too, between Slovenia and Friuli Venezia Giulia, from Bretto - Log pod Mangartom to Trieste, where you can explore what remains of the front on foot in the natural context of the area from the Julian Alps to the sea, experiencing this border area's culture, food, wine and ethnography. Fruit of an Italy-Slovenia Interreg project, the itinerary is currently being developed and will be offered from 2020 onwards.

There are many traces of World War Two in Friuli Venezia Giulia, too, and even more of the Cold War which left an indelible mark on the area with its vicinity to the then Yugoslavia and what was then called the Eastern Block. In recent years more and more organisations have been working to look after and reopen these military buildings.

The schedule of **free guided tours** dedicated to the **routes of the Great War throughout Friuli Venezia Giulia** is abundant. From the Karst Plateau surrounding the city of Trieste to the peaks of the mountains on the Austrian border, routes can be travelled, accompanied by expert historians and authorised guides. They are able not only to tell you the facts and recollections, but also to relive the experiences of the soldiers posted to the frontline.

From 2017, an audio guide will also be available (in Italian, English and German) to be able to visit the Redipuglia monumental area and the open-air museum of the Sinkhole of the 15th Marksmen Regiment (Dolina del XV Bersaglieri), behind the famous memorial.

Throughout the year, there will also be events and exhibitions in First World War locations in the form of projects funded by the Department of Culture.

Useful information

General Data - Friuli Venezia Giulia is an autonomous region whose autonomy was granted by a special statute in 1963. It is located in north-eastern Italy and is bordered by Austria to the north, Slovenia to the east, the Adriatic Sea to the south and the Veneto region to the west.

Origin of the name - "Friuli" comes from the Latin *Forum Julii*, or Julius's forum (dynasty of Julius Caesar or of the gens Julia). "Venezia Giulia" was added by Graziadio Isaia Ascoli's suggestion, a linguist from Gorizia who proposed to replace the name by which the Austrians called the area (*Küstenland*) with the current one, recalling the Roman tradition of the *Regio X Venetia et Histria* and of the *Alpes Juliae*.
